MASSACHUSETTS BOARD OF EDUCATION

Mr. James F. Crain, *Chairperson*, Gloucester
Dr. Raquel Bauman, *Vice Chairperson*, Holden

Mr. John J. Gould, Boston
Mr. William K. Irwin, Jr., Wilmington
Mr. Joseph E. Killory, Sandwich
Mrs. Anne S. Larkin, Bedford
Mr. Edward T. Moore, Jr., Bellingham
Dr. Richard R. Rowe, Belmont
Ms. Theodora A. Sylvester, Springfield
Mrs. Frances M. Turner, South Egremont
Dr. Joan Wallace-Benjamin, Boston
Mr. Frederick A. Wang, Needham

Dr. Franklyn Jenifer, *ex officio Board Member, Chancellor, Board of Regents of Higher Education*

Harold Raynolds, Jr., *Commissioner of Education, Secretary of the Board of Education*

OFFICE OF PLANNING, RESEARCH AND EVALUATION

Allan S. Hartman, Director of Research

M. Elizabeth Badger
Beverly Miyares
Brenda Thomas
Mary Robertson

The Massachusetts Department of Education ensures equal employment/educational opportunities/affirmative action regardless of race, color, creed, national origin or sex, in compliance with Title IV and Title IX, or handicap, in compliance with section 504.

THE MASSACHUSETTS TESTING PROGRAM

Background

“An Act Improving the Public Schools of the Commonwealth” was signed into law by Governor Michael S. Dukakis in July 1985. This legislation, Chapter 188 of the Acts of 1985, established a statewide testing program which began in 1986.

The Massachusetts Testing Program has three purposes:

- to improve curriculum and instruction in the public schools and districts;
- to identify students needing assistance in mastering basic skills in the classroom;
- to make results available to the public.

To accomplish the first purpose, the Board of Education created the Massachusetts Educational Assessment Program, which tests students at three grade levels biennially. Results are reported at the school, district, and state levels; in addition, the performance of Massachusetts students may be compared with that of their peers nationally.

The Massachusetts Basic Skills Testing Program was initiated in response to the second mandate. Each year, students in grades 3, 6, and 9 are tested in reading, writing, and mathematics. Results are reported at the individual, school, district, and state levels.

The table below outlines specific features of the Basic Skills program.

Purpose	Identify and assist students who are deficient in basic skills
Content Areas	Reading, writing, mathematics
Grade Levels	3, 6, 9
Exemptions	Students incapable of performing ordinary classwork in English and who have been enrolled in transitional bilingual education programs for fewer than three full years (unless testing is requested by parent); Special education students (if exemption is requested by parent)
Testing Frequency	Annually, in fall
Testing Time	60 minutes per subject
Information Collected	Student test performance; background information for Comparison Score Bands
Standards	65% correct in reading and mathematics; minimum writing proficiency
Retesting	Required for students who have not passed any grade 9 test(s)
Test Booklets	Uniform tests for each subject
Reporting Levels	Student, school, district, and state
Results Reported	January — March

All questions used in the Massachusetts Basic Skills Tests were developed for the program and were field tested by students in Massachusetts. All tests were reviewed by an equity concerns committee to ensure that they are fair and relevant to students of all backgrounds.

The Basic Skills tests were designed for specific purposes. Test results support valid conclusions in specific areas but may not support more general judgments about the performance of students or the quality of programs in any district. These cautions should be noted when interpreting results:

The Basic Skills Tests:

- measure mastery of minimal level skills, not overall achievement; therefore, one cannot generalize to overall student achievement.
- are aimed at identifying students needing remedial assistance; therefore, the tests do not distinguish among levels of mastery.
- are given at only three grade levels; therefore, generalizing to an entire school or district can be misleading and inappropriate.
- are not diagnostic or prescriptive; therefore, schools will need to diagnose learning problems and determine corrective procedures.
- are administered early in the school year; therefore, the results represent prior and cumulative learning.
- identify students who perform poorly for a variety of reasons; therefore, generalizing about reasons for poor performance is misleading.

The Basic Skills Reports:

- are for tests designed to identify individual students needing remedial assistance; therefore, programmatic evaluation is not appropriate unless a school or district has high percentages and numbers of students who fail the tests.

HOW TO USE THIS BOOK

Results for the the Basic Skills Testing Program for 1989 are included in this book. The data included in the tables are explained on the next page in sample shells of the report.

School districts are listed according to the categories used by the Massachusetts Department of Education in assigning code numbers to districts and schools. These categories are:

<u>Type of District</u>	<u>Range of Codes</u>
Local school districts	001 to 351
Independent vocational schools	401 to 408
Academic regional schools	600 to 760
Vocational-technical regional schools	801 to 885
County agricultural schools	910 to 915

Local school districts: Most Massachusetts schools are included in this category. There are, however, several localities that do not offer schooling at certain grades but send their students to regional schools or are members of school unions. In those instances, the appropriate reference is printed in place of data for that grade level.

Independent vocational schools, academic regional schools, vocational-technical regional schools, and county agricultural schools: The schools included in these sections generally enroll students from a variety of local districts for either a specialized purpose (as in the case of vocational schools) or because the local districts are too small to maintain schools at all grade levels (as in the case of academic regional schools). The data presented on those pages represent results only for the grade levels included in that particular district. No cross-references for data for other grades are provided, because the references would include a large number of local districts.

1989-90 SUMMARY OF DISTRICT PERFORMANCE

District	Grade	Content Area	Number Eligible	Percent Eligible	Number Passing	Percent Passing	Comparison Score Band																																																	
Name District Code	3	Reading Mathematics Writing All three tests	NUMBER/PERCENT ELIGIBLE: These columns include the numbers and percentages of students eligible for testing in each subject for the 1989 Basic Skills tests. Bilingual and special education students could be exempted from all tests or from selected tests under the circumstances noted on page 1 of this book. All other students, whether actually tested or not, are included in district results. The number of students reported as "Eligible" is the number of students enrolled in the district minus the number of students exempted from testing. Comparisons of different districts' results are difficult because the populations tested may not be comparable. Significantly larger or smaller percentages of students exempted or otherwise not tested would have an obvious impact on the results.																																																					
	6	Reading Mathematics Writing All three tests																																																						
	9	Reading Mathematics Writing All three tests																																																						
	3	Reading Mathematics Writing All three tests	NUMBER PASSING, PERCENT PASSING, AND COMPARISON SCORE BAND: These columns provide the number and percent of students passing each test and all three tests for the district. Comparison Score Bands are provided in each subject area. The Board of Education set 65 percent correct as the statewide standard to pass the reading and mathematics tests, and identified a level of skill necessary to pass the writing test. For purposes of comparison, the number and percent passing the tests statewide are: <table><tr><td></td><td colspan="2"><u>GRADE 3</u></td><td colspan="2"><u>GRADE 6</u></td><td colspan="2"><u>GRADE 9</u></td></tr><tr><td></td><td>Number</td><td>%</td><td>Number</td><td>%</td><td>Number</td><td>%</td></tr><tr><td></td><td>Passing</td><td>Passing</td><td>Passing</td><td>Passing</td><td>Passing</td><td>Passing</td></tr><tr><td>Reading</td><td>55,140</td><td>94.5</td><td>48,013</td><td>88.3</td><td>47,591</td><td>86.7</td></tr><tr><td>Mathematics</td><td>55,311</td><td>94.5</td><td>50,136</td><td>92.0</td><td>48,552</td><td>88.3</td></tr><tr><td>Writing</td><td>54,163</td><td>92.9</td><td>51,755</td><td>95.2</td><td>50,960</td><td>92.8</td></tr><tr><td>All three tests</td><td>51,085</td><td>87.7</td><td>45,640</td><td>84.2</td><td>44,737</td><td>81.8</td></tr></table>						<u>GRADE 3</u>		<u>GRADE 6</u>		<u>GRADE 9</u>			Number	%	Number	%	Number	%		Passing	Passing	Passing	Passing	Passing	Passing	Reading	55,140	94.5	48,013	88.3	47,591	86.7	Mathematics	55,311	94.5	50,136	92.0	48,552	88.3	Writing	54,163	92.9	51,755	95.2	50,960	92.8	All three tests	51,085	87.7	45,640	84.2	44,737	81.8

6	Reading Mathematics Writing All three tests																																																							
9	Reading Mathematics Writing All three tests																																																							
	3	Reading Mathematics Writing All three tests	Students who did not pass the tests were in one of two other categories not specified here: fail or unknown. The "unknown" category identifies students who did not provide sufficient evidence of their mastery of basic skills to make a pass/fail judgment. In reading and mathematics, these were students who were eligible for testing but did not turn in test materials, or who returned materials but made no attempt to answer any of the questions. In writing, the "unknown" category includes students who did not write an essay or who wrote an essay judged not scorable—one that was off-topic, too brief to evaluate, returned as a rough, rather than final, draft. The Comparison Score Band enables a district to compare its results with those of districts with similar Background Factors. The Comparison Score Band indicates where a school would be expected to score if it performs at the average level for its socioeconomic makeup. Background Factors are based upon the socioeconomic makeup of the student population and are described in greater detail in the school and district reports.

UNUSUAL CIRCUMSTANCES AFFECTING TESTING AND REPORTS

Massachusetts school superintendents were asked to provide information on "any unusual systemwide circumstances that . . . should be included in the public reporting of the statewide test results." The responses of superintendents who chose to report such circumstances are as follows and should be noted when reviewing and reporting their districts' results.

Everett: Everett experienced a teachers' strike for 2 1/2 weeks in September.

Gill-Montague: All Montague students in grades 3-6 were temporarily displaced to other school sites just prior to the opening of the 1989-90 school year. This condition persisted throughout the testing period.

Vocational Schools: The class scheduling in many vocational schools limits their flexibility in scheduling testing.
